## **Investment Approach**

Edgewood's Large Cap Growth Equity strategy pursues long-term capital growth through a portfolio of 22 stocks of large-sized companies that are distinguished by their financial strength, levels of profitability, strong management, and an ability to deliver long-term earnings power. Our goal is to purchase companies that trade at discounts to their fair value and believe that, over time, the stock prices of high-quality companies will rise to reflect the true value of the underlying company. The Large Cap Growth Equity strategy's performance is typically benchmarked against the S&P 500 Index over a full-market cycle.

### **Investment Process Highlights**

Edgewood's Large Cap Growth Equity strategy pursues a bottom-up investment process to construct a portfolio of U.S. large-cap growth companies. The investment team looks for potential investments across the economy where it can find growth irrespective of the sector or industry.

Edgewood's investment process focuses on two distinct areas:

#### **Stock Selection**

The team's investment process begins by identifying companies that are distinguished by their financial strength, levels of profitability, strong management, and an ability to deliver long-term earnings power. The team searches for companies that are well positioned for long-term growth, driven by demand for their products and services, trading at discounts to their fair value, and are at an early stage in their profit cycle to benefit from the increased cash flows produced by the profit cycle.

#### **Capital Allocation**

Based on the investment team's fundamental analysis of a company's profit cycle and using a five year discount to present value model, portfolio holdings evolve through three phases: Phase One investments are in the early part of their profit cycle and will warrant a more sizeable weighting once their profit cycle begins to grow; Phase Two investments are companies that are being increased to a larger weighting due to the relative attractiveness of their valuation which are moving through the strongest part of their profit cycle; and Phase Three investments are companies that are being reduced to a lesser weighting because they are nearing the team's estimate of full valuation or their profit cycle has begun to deteriorate.

Long Term EPS Growth***	33%	15%	Earnings Outlook	

<sup>\*</sup> All portfolio characteristics produced by Refinitiv and are rounded to the nearest whole number with the exception of the Most Recent Quarter YoY EPS Growth which is calculated by Edgewood.

\*\*\* The long term EPS growth for the S&P 500 is based on most recently available information provided by Bloomberg. The S&P 500 is an unmanaged index with no expenses which covers 500 industrial, utility, transportation and financial companies of US markets. It is a capitalization-weighted index calculated on a total returns basis with dividends reinvested.

# **Net Large Cap Growth Composite Returns (%)**

Edgewood Large Cap Growth Composite

S&P 500 (TR)\*

Russell 1000 Growth\*

Performance is rounded to the nearest tenth. Returns are a net of management fees. Returns shown here are annualized. Past performance does not guarantee future results.

\* The S&P 500 is an unmanaged index with no expenses which covers 500 industrial, utility, transportation and financial companies of US markets. It is a capitalization-weighted index calculated on a total return basis with dividends reinvested. The R1000 Growth measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth rates and dividends are reinvested.

<sup>\*\*</sup> Most recent quarter YoY EPS (year over year earnings per share) growth figures reflect the period ended 3/31/25 except for Copart, Intuit, Broadcom, NVIDIA and Synopsys whose fiscal quarters differ. These numbers are calculated based on company earnings reports and exclude the impact of non-recurring items not indicative of the underlying business, where appropriate. Blackstone's EPS figure is Distributable Earnings per share as we believe it is the most relevant valuation metric. Eli Lilly's EPS figure excludes the impact of acquired IPR&D charges because we believe it is most representative of Lilly's core business activities. Acquired IPR&D charges may be incurred upon execution of licensing agreements and other asset acquisitions. LLY does not forecast acquired IPR&D charges due to the uncertainty of the future occurrence, magnitude, and timing of these transactions. 2025-2026 earnings estimates for the S&P 500 along with the current quarter year over year earnings per share growth and 5-year estimated growth rates are based on most recently available information provided by Bloomberg.
