Investment Approach

Edgewood's Large Cap Growth Equity strategy pursues long-term capital growth through a portfolio of 22 stocks of large-sized companies that are distinguished by their financial strength, levels of profitability, strong management, and an ability to deliver long-term earnings power. Our goal is to purchase companies that trade at discounts to their fair value and believe that, over time, the stock prices of high-quality companies will rise to reflect the true value of the underlying company. The Large Cap Growth Equity strategy's performance is typically benchmarked against the S&P 500 Index over a full-market cycle.

Investment Process Highlights

Edgewood's Large Cap Growth Equity strategy pursues a bottom-up investment process to construct a portfolio of U.S. large-cap growth companies. The investment team looks for potential investments across the economy where it can find growth irrespective of the sector or industry.

Edgewood's investment process focuses on two distinct areas:

Stock Selection

The team's investment process begins by identifying companies that are distinguished by their financial strength, levels of profitability, strong management, and an ability to deliver long-term earnings power. The team searches for companies that are well positioned for long-term growth, driven by demand for their products and services, trading at discounts to their fair value, and are at an early stage in their profit cycle to benefit from the increased cash flows produced by the profit cycle.

Capital Allocation

Based on the investment team's fundamental analysis of a company's profit cycle and using a five year discount to present value model, portfolio holdings evolve through three phases: Phase One investments are in the early part of their profit cycle and will warrant a more sizeable weighting once their profit cycle begins to grow; Phase Two investments are companies that are being increased to a larger weighting due to the relative attractiveness of their valuation which are moving through the strongest part of their profit cycle; and Phase Three investments are companies that are being reduced to a lesser weighting because they are nearing the team's estimate of full valuation or their profit cycle has begun to deteriorate.

Portfolio Characteristics 03/31/2026*

	Edgewood	S&P 500	Comments
Market Cap Mean (Billions)	\$627	\$1,158	Focused on Growth
Number of Holdings	21	503	Concentrated Portfolio
Most Recent Quarter YoY EPS Growth**	32%	19%	Focused on Growth
Sales Growth (3 Years Historical)	23%	11%	Focused on Growth

*All portfolio characteristics produced by Refinitiv and are rounded to the nearest whole number with the exception of the Most Recent Quarter YoY EPS Growth which is calculated by Edgewood.

**Most recent quarter YoY EPS (year over year earnings per share) growth figures reflect the period ended 12/31/25 except for Intuit, Broadcom, NVIDIA and Synopsys whose fiscal quarters differ. These numbers are calculated based on company earnings reports and exclude the impact of non-recurring items not indicative of the underlying business, where appropriate. Blackstone's EPS figure is Distributable Earnings per share as we believe it is the most relevant valuation metric. Eli Lilly's EPS figure excludes the impact of acquired IPR&D charges because we believe it is most representative of Lilly's core business activities. Acquired IPR&D charges may be incurred upon execution of licensing agreements and other asset acquisitions. LLY does not forecast acquired IPR&D charges due to the uncertainty of the future occurrence, magnitude, and timing of these transactions.

Edgewood Management LLC is a registered investment adviser specializing in growth oriented investment management. The Edgewood Large Cap Growth Composite is comprised of individual and institutional accounts that invest in Edgewood's Large Cap Model of generally 22 large capitalization growth companies chosen by using fundamental analysis and an internal valuation discipline. The composite returns are benchmarked to the Standard & Poor's 500 Index ("S&P 500") and the Russell 1000 Growth Index ("R1000 Growth"). The S&P 500 is an unmanaged index with no expenses which covers 500 industrial, utility, transportation and financial companies of US markets. It is a capitalization-weighted index calculated on a total return basis with dividends reinvested. The R1000 Growth measures the performance of those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth rates and dividends are reinvested.

Edgewood Management LLC claims compliance with the Global Investment Performance Standards (GIPS®). Past performance returns are no guarantee of future results. Performance return results reflect the reinvestment of dividends and other earnings. Performance return results are expressed and calculated in U.S. dollars.
